

Surya Kiran Challagulla

Software Systems Engineer II

+1 (682)-344-8850 | suryakiranchallagulla@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

A seasoned Software Systems Engineer II with over 4+ years of expertise in architecting and deploying robust web applications utilizing Java, Spring Boot, React.js, and Node.js. Exhibits advanced proficiency in orchestrating cloud-native solutions on AWS, driving system optimization, and cost efficiency. Proficient in leveraging Apache Kafka and Spark for sophisticated real-time data processing, coupled with substantial experience in database optimization with MongoDB and Cassandra. Proficient in Agile methodologies, CI/CD pipeline automation, and crafting intuitive, high-performance user interfaces.

Skills

- **Languages:** Java, JavaScript, TypeScript, SQL, HTML, CSS, C, PHP, Python, C#, Bash/Shell, Data Mining
- **Frameworks & Libraries:** Spring Boot, Angular, React, Node.js, Hibernate, Spring MVC, JDBC, JPA, .NET Framework, JUnit, Mockito, Thymeleaf, RESTful APIs, Swagger, Postman, Bootstrap
- **Tools:** Jenkins, Docker, Kubernetes, Git, Maven, Gradle, Ansible, VS Code, Sumo, Jupyter Notebook, PyCharm, AWS EC2, AWS Lambda, AWS IAM, AWS S3, Rancher, UI/UX
- **Databases:** MySQL (SQL database), PostgreSQL, MongoDB (NoSQL database), Oracle, SQL Server, Hibernate-H2 database, Kafka
- **Cloud:** AWS, Azure, Google Cloud Platform
- **Testing:** JUnit, Selenium, Mockito, Postman, JIRA, SonarQube
- **Concepts & Methodologies:** Object-oriented programming, Data Structures, Data-Driven Development, Product Lifecycle, Cloud Infrastructure, Frontend Development, Backend Development, Microservices, Software Engineering, Cybersecurity, Design Patterns, Webforms, Software Design, System Architecture
- **Development Practices:** Agile (Scrum, Kanban), TDD, BDD, CI/CD

Experience

Software Systems Engineer II | Remote, USA

Oct 2024 - Present

Client: Mr.cooper, USA

- Engineered scalable full-stack applications with Java, Spring Boot, React.js, and Node.js, improving application load times by 30% and enhancing user experience.
- Spearheaded the development of cloud-native applications on AWS, utilizing services like Lambda, SQL, and API Gateway, reducing infrastructure costs by 20% and increasing system reliability by 35%.
- Leveraged Apache Kafka and Spark for real-time data processing, enabling efficient data analytics and reporting, leading to a 40% increase in data processing speed.
- Implemented machine learning models using TensorFlow and Scikit-Learn, boosting predictive analytics accuracy by 15% and enhancing decision-making capabilities.
- Refactored monolithic applications into microservices, enabling independent scaling and reducing system resource usage by 30%.
- Worked closely with UX/UI teams to design responsive and user-friendly web interfaces using HTML5, CSS3, and Bootstrap, resulting in a 25% increase in user engagement.
- Conducted unit and integration testing to ensure software reliability and quality before deployment, reducing post-release defects by 40%.
- Production support for Informatica workflows running on GCP, implementing monitoring and logging solutions with GCP's Stack driver and Cloud Monitoring tools.

Software Systems Engineer | Infosys, India

Oct 2019 - Dec 2021

Client: Penny Mac

- Engineered web-based Client-Server business applications using OOP and Java/J2EE technologies, improving system performance by 20%.
- Created functionalities under Agile Methodology and JIRA processes, utilizing JIRA for task assignment, bug tracking, and fixture, leading to a 30% increase in task resolution efficiency.
- Automated CI/CD pipelines with Jenkins and Docker, decreasing release cycles from bi-monthly to weekly, resulting in a 40% faster software delivery.
- Implemented Azure solutions for real-time data processing and application deployment, enhancing system performance and reducing latency by 30%.
- Designed reusable components using React for single-page applications and worked on multiple functionalities for TelebuHub client management, increasing user satisfaction scores by 15%.
- Discovered and resolved issues in legacy Python code, reducing technical debt by 25% and improving code maintainability by 12%, leading to a 10% boost in developer productivity.

Education

Master's in computer science

Jan 2022 – Dec 2023

University Of Maryland Baltimore County, Baltimore, USA

Bachelor's in computer science

Jul 2016 - May 2020

KLUniversity
